

# REVOLUTIONIZE YOUR WASTE EQUIPMENT PERFORMANCE WITH **iSMART TECHNOLOGY**

Efficient, Proactive and Sustainable solutions for all types of waste and recycling equipment, enabled by our advanced industrial IoT technology.

**SMART SOLUTIONS  
POWERED BY**

## **Fullness Optimization**

**Requires engagement from end user to obtain maximum efficiency and reduced haulage.**

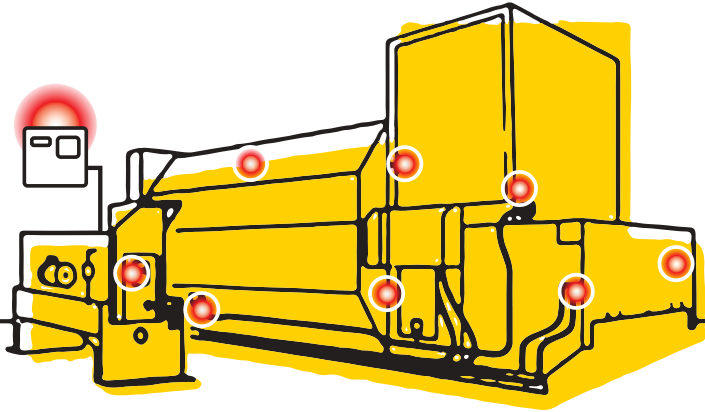

- ▶ **Compactor Fullness & Weight Analysis**
- ▶ **Monthly Trigger Optimization**
- ▶ **Insights into Capacity & Utilization**
- ▶ **Forecasting & Coordinating Pick Ups**
- ▶ **Hauler Performance Reporting**
- ▶ **Dedicated Account Coordination Team**
- ▶ **Access to iSMART Hub for Dashboard review**

## **Asset Management**

- ▶ **Proactive Diagnostics**
- ▶ **Asset Performance Optimization**
- ▶ **Usage Based Notifications for Preventative Maintenance (Based on Cycles)**
- ▶ **Asset Lifecycle Management**
- ▶ **Annual Fullness Review**
- ▶ **Service History of Equipment**
- ▶ **Dedicated Team for Support & Diagnostics**

# Enhanced Waste Equipment Management with IoT Technology

Monitor equipment in real time for potential remote repairs and diagnostics.

## Installation

iSMART can be installed on all types of waste equipment. From a single unit, or hundreds of units - whatever the scale, we can accommodate it.

With over 10,000 iSMART units installed throughout Canada and USA, we can help you automate your waste equipment management.

## Special Features

- ▶ Monthly Equipment Performance Report Card
- ▶ Preventative Maintenance Notifications
- ▶ Equipment Fullness Optimization

## Benefits of iSMART

Pre-schedule major repairs

Reduce up to 40% of total service hours

Extend equipment life and improve performance

Reduce hauling expenses by up to 35%

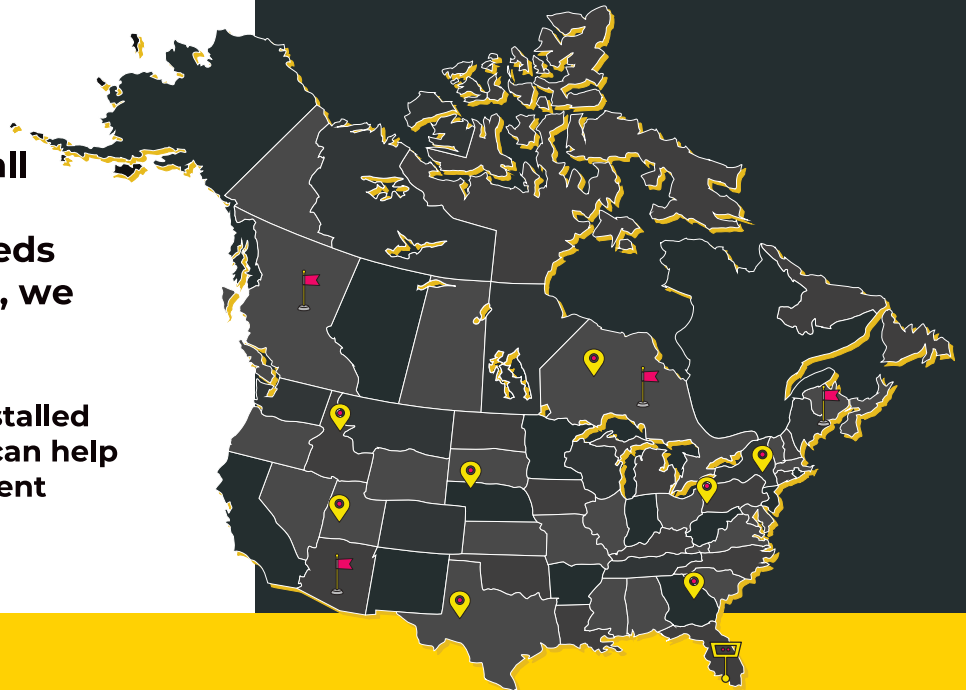

Access to waste fullness gauge for your equipment

Reduce downtime

Avoid unnecessary service trips with better asset management
